Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, Claims 1-3 and 12-15, drawn to a method of displaying tasks of a project within a selected set of data and tasks outside the selected set of data.
- Group II, Claims 4 and 5, drawn to a method for accessing task data associated with a selected part of a project without accessing all of the project data.
- Group III, Claims 6-8, drawn to a method for displaying only a selected task of a project and either predecessor tasks or successor tasks of the selected task.
- Group IV, Claims 9 and 10, drawn to a method for displaying task data associated with a selected task of a project, wherein the task data comprises display data and non-display data.
- Group V, Claim 11, drawn to a method for filtering and displaying only those tasks of a project that meet a selected parameter value.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-V do not have a common "special technical feature." The expression "special technical features"

means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. The preamble of every claim in each group recites "creating a program management chart." However, "creating program management charts" is not novel and makes no contribution over the prior art. Groups I-V each recite a different way of creating the program management chart. The recited limitations for the claims in each individual group will distinguish that group from the prior art **and** from each of the other groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
